

AI offers several opportunities for helping the medical profession, such as diagnosing diseases and identifying the best treatment plans for patients with critical medical decisions. Another example of AI in healthcare is the AI-powered robotics in the operating room that assist with surgery.

AI jobs in healthcare require a deep understanding of medical conditions and terminology as much as they require AI expertise.

Expected salary: \$150,000-\$250,000 annually.

Andy Patrizio is a technology journalist with almost 30 years' experience covering Silicon Valley who has worked for a variety of publications – on staff or as a freelancer – including Network World, InfoWorld, Business Insider, Ars Technica and InformationWeek.
