1.

The reading article [Automation at work revisited: This is how AI will be integrated into the jobs of tomorrow](#) suggests which of the following is appropriate to understand AI in the context of future jobs?

☐ As a standalone replacement for human workers

☐ As a technology solely for automating tasks.

☒ As a tool to enhance human efficiency and creativity.

☐ As a technology to eliminate the need for workforce adaptation.

Correct

2.

According to the article [Choosing AI's impact on the future of work](#), which of the following is a necessary change for AI to benefit workers rather than to replace them?

☐ Increased surveillance and monitoring of workers' productivity.

☒ Management's view of labor as a key resource whose productivity should be augmented.

☐ Emphasis on the development of artificial general intelligence.

☐ Eliminate human involvement in decision-making tasks.

Correct

The article explicitly states that for AI to be beneficial (and not merely replace workers), management must recognize labor as a key resource, whose productivity should be augmented, whose information should be improved, and whose training should be a priority. This is seen as crucial for the long-term health of companies and the promotion of productivity growth ("Management needs to see and understand workers as a key resource whose productivity should be augmented").

3.

According to the reading article [Automation at work revisited: This is how AI will be integrated into the jobs of tomorrow](#), what is a key aspect to harness the full potential of AI in future jobs?

☐ Relying solely on AI for decision-making.

☐ Ignoring the need for workforce adaptation.

☐ Resisting AI integration into the workforce.

☒ Adaptation and re-skilling of the workforce.

Correct

4.

According to the reading article [AI Revolution: Job Statistics - The Impact on Employment in 2024](#), what are some potential consequences of job displacement due to AI?

☐ Increased job opportunities.

☐ Decreased need for workforce re-skilling.

☒ Concerns about unemployment rates.

☐ Stagnation in technological advancements.

Correct

5.

What is a key question raised in the reading article [AI and the automation of work - Benedek Egers](#) regarding the future of work and AI?

☐ The irrelevance of education.

☒ The decline of job opportunities.

☐ The future distribution of wealth.

☐ The location of AI from other technologies.

Incorrect

Incorrect. While job displacement is discussed, Egers also highlights the creation of new jobs.

6.

As shown in the PowerPoint slides for Module 5, what percentage of employees' time today could be potentially automated by Generative AI and other technologies according to the McKinsey report?

☐ 20% to 40%

☐ 40% to 60%

☒ 60% to 70%

☐ 70% to 80%

Correct

Generative AI and other technologies have the potential to automate work activities that currently absorb a significant portion, specifically 60% to 70%, of employees' time.

7.

According to the PowerPoint slides for Module 5, what is the potential labor productivity growth enabled by Generative AI annually through 2040, as mentioned in the McKinsey report?

☒ 0.1% to 0.6%

☐ 0.4% to 0.9%

☐ 0.7% to 0.9%

☐ 1.0% to 1.2%

Correct

Generative AI could enable labor productivity growth within this range annually through 2040, contributing to economic efficiency and innovation.

8.

What is a significant focus of the reading article titled [Succession AI and the Future of Work in America](#)?

☒ The potential efficiency gains of generative AI.

☐ The limitations of generative AI in content creation.

☐ The decline of industries unaffected by generative AI.

☐ The elimination of all ethical considerations in AI-generated content.

Correct

9.

According to the reading article [AI and the automation of work - Benedek Egers](#), what is a potential challenge in integrating AI into industries?

☐ Ensuring job creation.

☒ Reducing workforce displacement.

☐ Simplifying economic growth.

☐ Reducing skill mismatches.

Correct

10.

How does the reading article [AI and the automation of work - Benedek Egers](#) compare AI to the "productivity paradox" of the computer age?

☒ It suggests AI will immediately lead to job creation.

☐ It highlights the simplicity of integrating AI into industries.

☐ It argues that AI will inevitably lead to economic growth.

☐ It suggests that the true impact of AI may only be fully understood in hindsight.

Incorrect

The article suggests that the impact of AI on job creation may not be as straightforward as anticipated, similar to the productivity paradox observed during the computer age.

11.

What does the article [Generative AI: Challenges Are Realities How We Live and Work Today](#) mention as a potential challenge associated with the widespread adoption of chatbots?

☐ Improved customer service.

☐ Streamlining business operations.

☒ Privacy and security concerns.

☐ Decreased efficiency in user experiences.

Correct

12.

What does the article [AI Tool Aids for 2024](#) suggest about the demand for AI skills in the job market?

☐ Decreasing demand for AI skills.

☐ Unchanging demand for AI skills.

☒ Increasing demand for AI skills.

☐ Fluctuating demand for AI skills.

Correct

13.

What does the reading article [Future of work by 2030 - 2021](#) emphasize regarding workers in the digital era?

☐ Decreased importance of adapting to new forms of employment.

☐ Lack of opportunities in the gig economy.

☐ The necessity of relying solely on traditional employment models.

☒ The importance of upskilling and adapting to new forms of employment.

Correct

14.

The reading article [AI in 2024: My Top 5 Concerns and Top 5 Hopes](#) expresses which of the following as a hope for AI?

☐ Exacerbating societal inequalities.

☐ Undermining privacy and autonomy.

☒ Enhancing healthcare and education.

☐ Creating job displacement.

Correct

15.

Considering this reading article [Future of work by 2030 - 2021](#), which profession is estimated to have the highest growth in the US?

☐ Creatives for example artists, designers, entertainers, media worker

☐ Unpredictable physical work, including specialized mechanics and repair, emergency first responders, material movers and loaders, machinery installation and repair workers, agricultural field workers, transportation maintenance, building and grounds cleaners

☒ Builders including Building engineers, architects, surveyors, construction workers, installation and repair workers (Buildings and infrastructure), crane and tower operators

☐ Predictable physical work, for example, equipment installation and repair workers, protective services, janitorial, industry workers, dishwashers, cleaning equipment operators, food preparation workers, general mechanics.

Correct

This profession is expected to grow 35%.
