According to the reading article titled [How Stitch Fix is using Generative AI to Help Us Dress Better](#), how is Stitch Fix using Generative AI to handle its customer data?

 - ☐ By ignoring customer feedback due to the unstructured nature of the data
 - ☐ By retaining data retention to improve data quality
 - ☐ By manually categorizing customer preferences through human analysis
 - ☒ By converting free-form text data into structured data points

Correct
Generative AI enables Stitch Fix to quickly make sense of and summarize customer preferences and feedback, even if it's in free-form text, by extracting meaningful insights from the data.

2.

According to the reading article titled [Generative AI History](#), who was one of the early pioneers of neural networks in the 1940s, and what technique did he develop?

 - ☒ Geoffrey Hinton developed a technique called "Boltzmann Machines" that could generate new data using a network of interconnected nodes.
 - ☐ Andrew Ng developed a technique called "Boltzmann Machines" that could generate new data using a network of interconnected nodes.
 - ☐ Geoffrey Hinton developed a technique called "Support Vector Machines" that could generate new data using a network of interconnected nodes.
 - ☐ Geoffrey Hinton developed a technique called "Boltzmann Machines" that could analyze existing data using a network of interconnected nodes.

Correct
Geoffrey Hinton was one of the early pioneers of neural networks and he developed a technique called "Boltzmann Machines" that could generate new data using a network of interconnected nodes.

3.

According to the article [Why Businesses Need Explainable AI](#), why is explainability becoming more challenging in modern AI systems?

 - ☐ Companies are not investing in the right set of tools.
 - ☐ AI systems are inherently designed to be unexplainable.
 - ☒ Advanced AI modeling techniques like deep learning and neural networks are more difficult for humans to understand.
 - ☐ Different industries have conflicting regulatory requirements.

Correct
The passage explains that deep learning and neural networks, which power many AI applications, are inherently more complex and challenging to understand.

1 / 1 point
4.

According to the reading article titled [How Explainable AI Decision-Making Assurances](#), why is explainable AI valuable in decision-making applications?

 - ☐ To complicate decision-making processes, introducing layers of complexity.
 - ☐ To limit access to decision-making algorithms, protecting proprietary information.
 - ☒ To provide users with insights into the reasoning behind AI-generated decisions, enhancing transparency and trust.
 - ☐ To accelerate decision-making by bypassing human oversight.

Correct
Explainable AI is valuable in decision-making applications because it interprets how AI algorithms reach specific conclusions, thereby enhancing transparency and trust.

5.

According to the reading article titled [Generative AI in 2024: The 6 most important consumer tech trends](#), how will headsets (XR) redefine the world in 2024?

 - ☒ By democratizing 3D content generation and enhancing XR interactions with generative AI
 - ☐ By limiting XR capabilities to enthusiasts only
 - ☐ By decreasing the affordability of XR hardware options
 - ☐ By restricting the use of generative AI in virtual environments

Correct
The article highlights how generative AI will play a crucial role in improving XR experiences by democratizing 3D content generation, providing lifelike 3D avatars, and enabling intuitive voice interfaces.

1 / 1 point
6.

According to the PowerPoint slides for Module 7, what is the Crystal Candle resource used by LinkedIn?

 - ☐ Crystal Candle is a high-priced board of candles that is used for birthday events.
 - ☐ Crystal Candle is the codename for a secret software program that aims to effectively monitor and defend against hacking attacks on its systems.
 - ☒ Crystal Candle is able to interpret and convert non-structured machine learning model outputs into customer-friendly narratives that are clear and actionable.
 - ☐ Crystal Candle is the name of a sophisticated computer chip designed for supercomputers.

Correct

1 / 1 point
7.

According to the [Executive AI and the Future of Work 2023 Deloitte report](#), how should organizations retool their workforce in the Generative AI era?

 - ☐ By replacing all human tasks with automated tasks
 - ☒ By emphasizing skills that can be categorized into automated tasks, limited impact tasks, augmented skills, and new skills
 - ☐ By assigning all tasks to machines without distinguishing between different types of tasks
 - ☐ By reducing the emphasis on skills to focus more on routine tasks

Correct
The report advocates for carefully examining the workforce by categorizing skills into four groups: automated tasks, limited impact tasks, augmented skills, and new skills, helping organizations retool their workforce.

1 / 1 point
8.

According to the reading article [Generative AI in 2024: The 6 most important consumer tech trends](#), what is the expected role of generative AI in the future of Extended Reality (XR) experiences?

 - ☐ Generative AI will replace all human interaction in XR devices.
 - ☐ Generative AI will have no significant role in the future of XR experiences.
 - ☒ Generative AI will play a crucial role in improving and scaling XR experiences, democratizing 3D content generation, creating more realistic virtual environments, and powering voice interfaces and lifelike 3D avatars.
 - ☐ Generative AI will only be used to create lifelike 3D avatars in XR.

Correct

1 / 1 point
9.

According to the PowerPoint slides for Module 7, which of the following is a limitation of MAI?

 - ☒ Precise definitions of explainable AI vary across contexts and applications.
 - ☐ MAI is exclusively targeted at individuals who are highly trained and knowledgeable about AI.
 - ☐ MAI is the art of generating creative and incorrect explanations of machine learning outputs that ordinary people cannot understand.
 - ☐ None of the above options is correct.

Correct

1 / 1 point
10.

How does the reading article titled [Generative AI will remain AI's ally until at least 2028](#) suggest businesses can prepare for the expected growth in generative AI spending?

 - ☐ By reducing reliance on AI technologies to minimize expenses.
 - ☐ By avoiding partnerships and collaborations in the AI industry.
 - ☐ By downsizing AI departments to cut costs.
 - ☒ By investing in research and development to stay ahead of the curve.

Correct
The article suggests that businesses should invest in R&D to innovate and stay competitive as generative AI spending increases.

1 / 1 point
11.

What is a significant challenge in using generative AI tools for search purposes in [How to Demystify Search with Generative AI](#)?

 - ☒ Outdated or biased training data can lead to inaccurate outputs
 - ☐ Generative AI tools always provide accurate search results
 - ☐ They cannot analyze survey responses
 - ☐ AI models are unable to summarize long documents

Correct
The article warns that if AI models are trained on outdated or biased data, the search results may be inaccurate.

1 / 1 point
12.

What is the significance of explainable AI in text processing as described in the reading article titled [How Explainable AI Decision-Making Assurances](#)?

 - ☐ It has no role in text processing and is used only in image recognition.
 - ☐ It only focuses on improving the accuracy of spam detection algorithms.
 - ☒ It helps in understanding the AI's decision-making process by identifying key patterns and entities in text.
 - ☐ It is limited to enhancing machine translation accuracy.

Correct
The text highlights the importance of explainable AI in making the workings of AI algorithms understandable in text processing, by uncovering patterns and explaining decisions based on named entity recognition and other techniques.

1 / 1 point
13.

According to reading article titled [Explainable AI: The key to unlock Generative AI's potential](#), what is the approach to incorporate explainable AI into the development of generative AI technologies?

 - ☐ By reducing the interpretability of generative AI models.
 - ☐ By excluding human oversight from the generative AI development process.
 - ☐ By increasing the opacity of generative AI algorithms.
 - ☒ By designing models that provide clear insights into the decision-making processes of generative AI systems.

Correct
The article emphasizes that incorporating Explainable AI into Generative AI involves designing models that make their decision-making processes more transparent and understandable.

1 / 1 point
14.

According to the reading article titled [What is Explainable AI](#), what role does explainability play in healthcare?

 - ☒ Providing transparency in clinical decision support systems
 - ☐ Allowing machines to replace doctors in medical diagnosis
 - ☐ Creating imprecise explanations to ensure patient confidentiality
 - ☐ Developing algorithms that do not require validation

Correct
The article mentions that explainability is crucial in healthcare because it provides transparency, enabling shared decision-making between medical professionals and patients.

1 / 1 point
15.

According to the reading article titled [Explainable Generative AI](#), what are some approaches used in generative AI?

 - ☒ Markov chains, GANs, diffusion models, and transformers
 - ☐ Bayesian inference and reinforcement learning
 - ☐ Convolutional neural networks (CNNs) and decision trees
 - ☐ Rule-based logic and structured query language (SQL) models

Correct
The article discusses these approaches as major techniques used in generative AI, each offering a different method for generating new data.
