Course Welcome

Module 1 Introduction

Lesson 1: Introduction to deep learning

Lesson 2: Neural network

Lesson 3: Backpropagation

Reading: Deep Learning - Chapter 6.2, 6.4, 6.5 1h

Video: Backpropagation 8 min

Video: Backpropagation Continued 10 min

Practice Assignment: Backpropagation Quiz Submitted

Module 1 Summative Assessment

Module 1 Summary

Your grade: 100%

Your latest: 100% • Your highest score: 100% • To pass you need at least 80%. We keep your highest score.

Backpropagation Quiz

Review Learning Objectives

Instructions

1. What is the primary purpose of the backpropagation algorithm in neural networks? 1 / 1 point

- To optimize the network architecture
- To decrease the size of the input data
- To increase the speed of the forward pass
- To adjust the weights of the network based on the loss gradient

Correct
Correct

Submitted
Nov 23, 2:44 AM IST

Attempts

Retry

2. During the backward pass in backpropagation, how are gradients computed for layers that are not the output layer? 1 / 1 point

- By propagating the gradients backward from the output layer
- Through the use of activation functions only
- By resetting the weights to their initial values
- By directly comparing the inputs and outputs

Correct
Correct

Your grade
100%

To pass you need at least 80%. We keep your highest score.
