Module 3 Introduction
Lesson 1: ReLU and Maxout
Lesson 2: RMSProp
Reading: An overview of gradient descent optimization algorithms 1h
Video: Adaptive Learning Rate 6 min
Video: Adaptive Learning Rate Continued 6 min
Practice Assignment: RMSProp Quiz Submitted
Lesson 3: Early stopping and Regularization
Lesson 4: Dropout
Module 3 Summative Assessment
Module 3 Summary

Your grade: 100%

Your latest: **100%** • Your highest score: **100%** • To pass you need at least 80%. We keep your highest score.

1. What does RMSProp use to adapt the learning rate? **1 / 1 point**

- ○ The mean of the gradients
- ○ The magnitude of the parameter update
- ○ The sum of all previous gradients
- ◉ The root mean square of the gradients with previous gradients being decayed

Correct
Correct!

2. What does the term "momentum" in gradient descent algorithms help to achieve? **1 / 1 point**

- ○ Increase the gradient.
- ○ Guarantee reaching the global minimum.
- ○ Decrease the learning rate.
- ◉ Help convergence in training.
