

- RELU and Maxout Quiz
- Practice assignment 3 of 4
- Module 3 Introduction
- Lesson 1: ReLU and Maxout
- Reading: Maxout Networks (1h)
- Video: Tips for Deep Learning (7 min)
- Video: ReLU (10 min)
- Practice Assignment: ReLU and Maxout Quiz (Submitted)
- Lesson 2: RMSProp
- Lesson 3: Early stopping and Regularization
- Lesson 4: Dropout
- Module 3 Summative Assessment
- Module 3 Summary

Your grade: 100%

Your best: 100% - Your highest score

ReLU and Maxout Quiz

Instructions

Review Learning Objectives

1. What is a sign of overfitting in a neural network?
- ☒ Good results on training data but poor on testing data
- ☐ The model cannot converge
- ☐ Poor results on both training data and testing data
- ☐ Good results on both training data and testing data

2. What is the primary reason for using a Rectified Linear Unit (ReLU) in deep neural networks?
- ☐ It requires extensive computational resources.
- ☐ It helps in reducing the network's accuracy.
- ☐ It increases the model's training time.
- ☒ It addresses the vanishing gradient problem.
