Your latest: 100% • Your highest: 100% • To pass you need at least 80%. We keep your highest score.

1.

(**Special note:** Below there are five questions for you to answer. Naturally there are many mathematical formulas and equations in the problem statements. However, due to some technical issues on Coursera, from time to time for some learners, some formulas and equations cannot be displayed correctly (while some others can). As there is no way for the instructing team to solve this issue, we post all the problem statements in a PDF file [here](#) [🔗](#). If unfortunately some formulas and equations are not readable for you, please use the PDF file to prepare your answers and then come back to Coursera to choose/fill in your answers.)

Among the following terms, which is the farthest from Operations Research?

☐ Management Science.

☐ Decision Science.

☐ Optimization method/algorithm.

☒ Electronic engineering.

☐ Mathematical programming.

✔

Correct

1 / 1 point
2.

In the field of Business analytics, there are three main components: Descriptive analytics, Predictive analytics, and Prescriptive analytics. Which part does Operations Research mainly focus on?

☐ Descriptive analytics.

☐ Predictive analytics.

☒ Prescriptive analytics.

☐ All of the above.

☐ None of the above.

✔

Correct

1 / 1 point
3.

In the knapsack problem mentioned in this week, our objective is to _____, and our constraint is that _____.

☒ Maximize total value; the total weight cannot be greater than the knapsack capacity.

☐ Minimize total value; the total weight cannot be smaller than the knapsack capacity.

☐ Maximize total weight; the total value cannot be greater than the knapsack capacity.

☐ Minimize total weight; the total value cannot be smaller than the knapsack capacity.

☐ None of the above.

✔

Correct

1 / 1 point
4.

When some or all of the variables in a mathematical program are restricted to be integers, what is the name of the subject?

☒ Integer programming.

☐ Linear progrmming.

☐ Nonlinear programming.

☐ Dynamic programming.

☐ Robust programming.

✔

Correct

1 / 1 point
5.

We have learned some basic concepts of Operations Research in this week. Which of the following problems is the most inappropriate for one to solve it with Operations Research?

☐ Shift planning for a call center.

☐ Inventory management for a retailer.

☒ Developing a website for a cosmetic company

☐ Route planning for a logistics company.

☐ Game scheduling for a professional sports league.

✔

Correct

1 / 1 point
