

Module 1 Quiz

Quiz, 10 questions

10/10 points (100%)

✓ **Congratulations! You passed!**

[Next Item](#)1 / 1
points

1.
Select all the true statements below.
-

1 / 1
points

2.
A network that has parallel edges (a pair of nodes with different types of concurrent relationships) is called a _____.
-

1 / 1
points

3.
Suppose we want to plot a network representing a small food web for students in a biology class. In order to give them a better understanding of the network, we want to show who is the predator and who is the prey. For those predators who have multiple options for prey, we also want to represent the predator's preferences (i.e. which prey it likes most or second most). Choose the most appropriate type of network.

points

4.
Select all true statements:
-

1 / 1
points

- 5.

Module 1 Quiz

10/10 points (100%)

Quiz, 10 questions

```
1 import networkx as nx
2
3 G=nx.MultiGraph()
4 G.add_node('A',role='manager')
5 G.add_edge('A','B',relation = 'friend')
6 G.add_edge('A','C', relation = 'business partner')
7 G.add_edge('A','B', relation = 'classmate')
8 G.node['A']['role'] = 'team member'
9 G.node['B']['role'] = 'engineer'
10
```

1 / 1
points

6.

Based on the following lines of code, what's the correct statement to access the edge attribute "friend"?

```
1 import networkx as nx
2
3 G=nx.MultiGraph()
4 G.add_node('A',role='manager')
5 G.add_edge('A','B',relation = 'friend')
6 G.add_edge('A','C', relation = 'business partner')
7 G.add_edge('A','B', relation = 'classmate')
8 G.node['A']['role'] = 'team member'
9 G.node['B']['role'] = 'engineer'
10
```

1 / 1
points

7.

After all lines of code below are executed, what is(are) the role(s) of node A?

```
1 import networkx as nx
2
3 G=nx.MultiGraph()
4 G.add_node('A',role='manager')
5 G.add_edge('A','B',relation = 'friend')
6 G.add_edge('A','C', relation = 'business partner')
7 G.add_edge('A','B', relation = 'classmate')
8 G.node['A']['role'] = 'team member'
9 G.node['B']['role'] = 'engineer'
10
```

Check all that apply:
