points

1.

Consider the given network. What is the value of node F's local clustering coefficient?

1 / 1
points

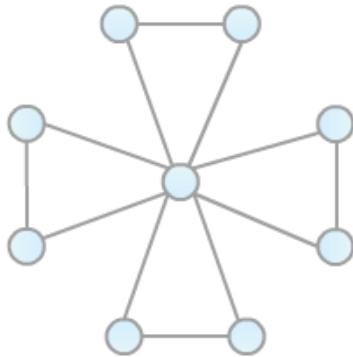

2.

Module 2 Quiz

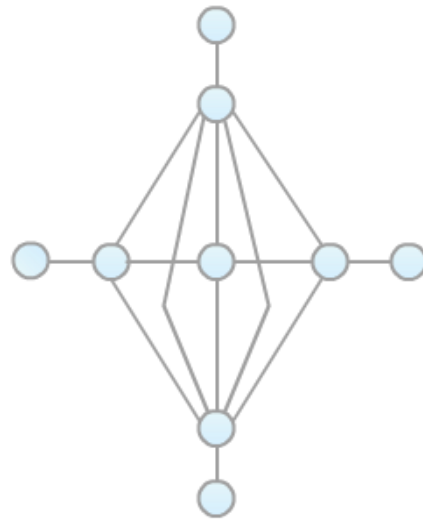

Quiz, 10 questions

9/10 points (90%)

Given the following two networks, which of the following is True?

(A)

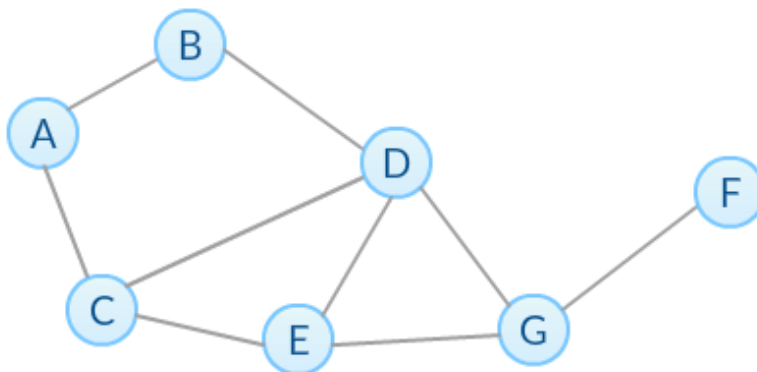

(B)

0 / 1
points

3.

Consider the network shown below and select all that apply.

1 / 1
points

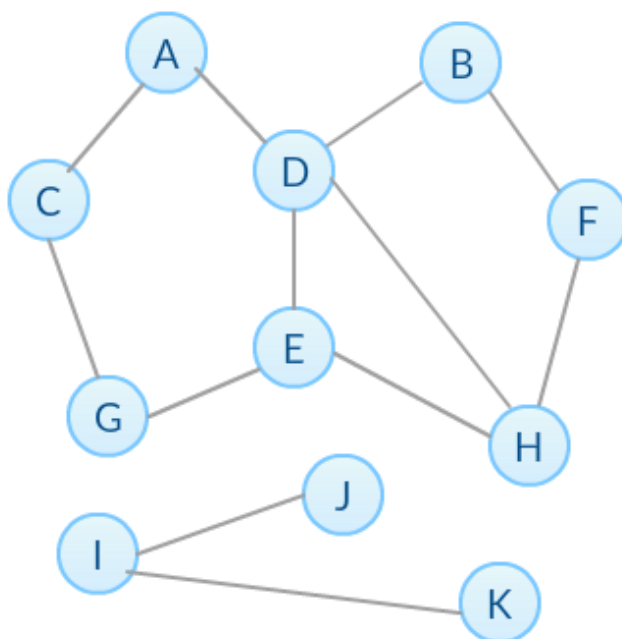

4.

Module 2 Quiz

Quiz, 10 questions

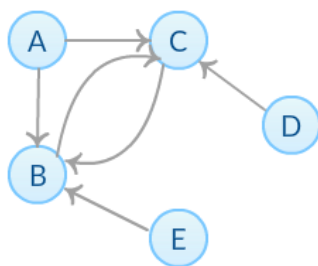

9/10 points (90%)

Select all that apply for the network below.

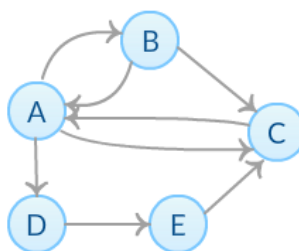

1 / 1
points

5.

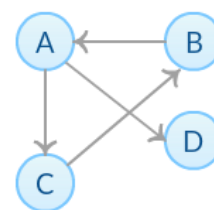

Consider three networks (A), (B) and (C) below and select all that apply.

(A)

(B)

(C)

1 / 1
points

6.

Module 2 Quiz

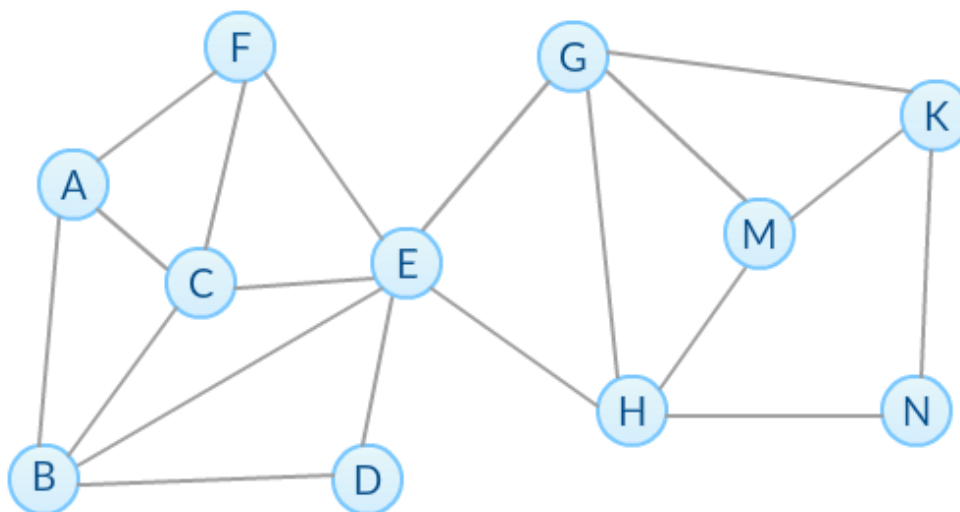

Which of the following is true about network robustness and connectivity?
Select all that apply.

Quiz, 10 questions

9/10 points (90%)1 / 1
points

7.

Consider the network given below.

What's the node connectivity of the network?

1 / 1
points

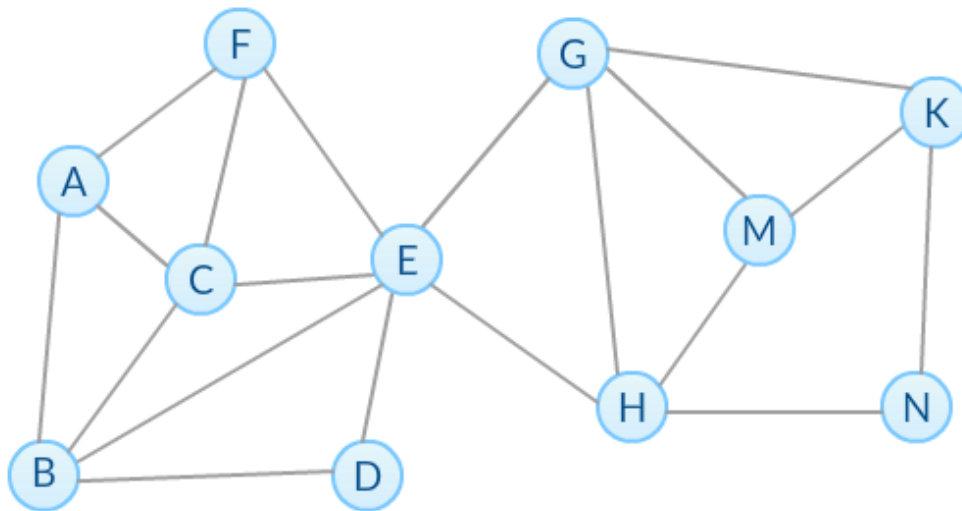

8.

Module 2 Quiz

Quiz, 10 questions

9/10 points (90%)

Consider the network given below.

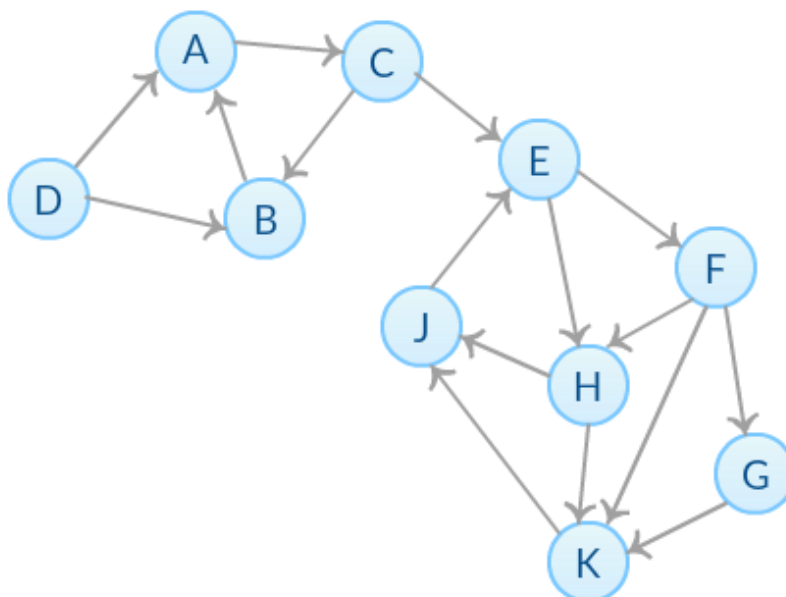

What is the edge connectivity of the network?

1 / 1
points

9.

The directed network below shows how information can be transferred between nodes. For example, node A can pass the information to node C directly but not vice-versa. If node C wants to send messages to node A, all data must be forwarded by node B.

What is the total number of simple paths from node D to node K?

1 / 1
