

Welcome to graph-tool's documentation!

Contents:

- » Quick start using *graph-tool*
 - › Creating and manipulating graphs
 - Iterating over vertices and edges
 - › Property maps
 - Internal property maps
 - › Graph I/O
 - › An Example: Building a Price Network
 - › Graph filtering
 - Graph views
- » The **gt** file format
- » Cookbook
 - › Inferring network structure
 - Background: Nonparametric statistical inference
 - The stochastic block model (SBM)
 - Inferring the best partition
 - Averaging over models
 - Edge layers and covariates
 - Predicting spurious and missing edges
 - References
 - › Animations with graph-tool
 - SIRS epidemics
 - Dynamic layout
 - Interactive visualizations
- » Module documentation
 - › graph_tool - efficient graph analysis and manipulation
 - Summary
 - How to use the documentation
 - Contents
 - › Available subpackages
 - **graph_tool.centrality** - Centrality measures
 - **graph_tool.clustering** - Clustering coefficients
 - **graph_tool.collection** - Dataset collection
 - **graph_tool.correlations** - Correlations
 - **graph_tool.draw** - Graph drawing and layout
 - **graph_tool.flow** - Maximum flow algorithms
 - **graph_tool.generation** - Random graph generation

- ▶ [graph_tool.inference](#) - Statistical inference of generative network models
 - ▶ [graph_tool.search](#) - Search algorithms
 - ▶ [graph_tool.spectral](#) - Spectral properties
 - ▶ [graph_tool.stats](#) - Miscellaneous statistics
 - ▶ [graph_tool.topology](#) - Assessing graph topology
 - ▶ [graph_tool.util](#) - Graph utilities
- » [Frequently Asked Questions \(FAQ\)](#)
- › [How do I cite graph-tool?](#)
