Q4 & Q5 Assignment 4: is the grader correct? @STAFF please check

SD Sandipan Dey Learner

4 minutes ago

Although the samples' sizes n_1 and n_2 are not given explicitly for the two samples in the problem setup section for Q4 and Q5, assuming $n_1=100$ and $n_2=200$ from previous setups and using the fact that

$$\text{var}(\hat{d}) = \text{var}(\hat{p}_1) + \text{var}(\hat{p}_2) = \frac{p_1(1-p_1)}{n_1-1} + \frac{p_2(1-p_2)}{n_2-1}$$

and substituting the values, the grader reports error.

Even tried with

$$\text{var}(\hat{d}) = \text{var}(\hat{p}_1) + \text{var}(\hat{p}_2) = p_1(1-p_1) + p_2(1-p_2)$$

This does not work too.

@STAFF Any clue on where I am wrong? Thanks in advance.
