Meet Your Instructors

Welcome to Computer Vision for Engineering and Science. We're excited you're here to gain skills in this rapidly expanding field. We are all passionate about teaching and are excited to bring you a fun, interactive, and inclusive learning experience.

You'll see and hear some of us in the videos, but everyone below developed examples, quizzes, and content to help you learn about computer vision. We had a lot of fun building this course and hope you'll find the material useful in your career. If you get stuck, just post your question on the forums. Good luck!

Amanda Wang is an Online Content Developer at MathWorks. She earned a B.S. in Mathematics with Computer Science and a B.S. in Business Analytics from MIT in 2020. In addition to developing MATLAB-based courses with the Online Course Development team, she is currently pursuing an M.S. in Computer Science from the University of Illinois Urbana-Champaign.

Isaac Bruss is a Senior Online Content Developer at MathWorks. He earned his Ph.D. from the University of Massachusetts Amherst in 2015, performing research in a number of projects related to biophysics. One such project involved using confocal microscope videos to track the migration of nanoparticles tethered to a surface using DNA. Most recently, he taught undergraduate physics at Hampshire College. Now at MathWorks, he happily supports and designs MATLAB-based online courses.

Matt Rich is a Senior Online Content Developer at MathWorks. He holds a Ph.D. and M.S. in Electrical Engineering from Iowa State University. His Ph.D. research developed new methods to design control systems over networks with communication interrupted by random processes. His MS research focused on system identification and robust control methods for small UAVs with uncertain physical parameters. Prior to his current role, he worked supporting MathWorks Model-Based Design tools in industry and academia.

Megan Thompson is a Senior Online Content Developer at MathWorks. She earned her Ph.D. in bioengineering from the University of California at Berkeley and San Francisco in 2018. As a medical imaging research scientist, she used image processing to study concussions in football, dementia, schizophrenia and more. Now at MathWorks, she designs and supports MATLAB-based online courses to help others analyze data and chase their own answers.

Brandon Armstrong is a Senior Team Lead in Online Course Development at MathWorks. He earned a Ph.D. in physics from the University of California at Santa Barbara in 2010. His research in magnetic
