Mars Rover: Your Final Project

Congratulations on reaching the end of the course! It's time to apply your skills to a final project. Read this project introduction. Then navigate to the "Module 4" folder to open

MarsRoverFinalProject.mlx included with the course files to get started.

Stitch Together Images from the Mars Curiosity Rover

The Mars Curiosity rover has several cameras and scientific instruments. The images are [available on the web](#) courtesy of NASA/JPL-Caltech.

Your goal is to create a fuller view of the martian landscape by stitching together two images from the rover's left navigation camera. Both images are already included in the course files.

Your final image will look something like this (but not exactly-- this purposely has an error!)
