# Course Overview

Welcome to Developing Explainable AI! As Artificial Intelligence becomes integrated into high-risk domains like healthcare, finance, and criminal justice, it is critical that those responsible for building these systems think outside the black box and develop systems that are not only accurate, but also transparent and trustworthy. This course provides a comprehensive introduction to Explainable AI (XAI), empowering you to develop AI solutions that are aligned with responsible AI principles.

Through discussions, case studies, and real-world examples, you will gain the following skills:

- Define key XAI terminology and concepts, including interpretability, explainability, and transparency.
- Evaluate different interpretable and explainable approaches, understanding their trade-offs and applications.
- Integrate XAI explanations into decision-making processes for enhanced transparency and trust.
- Assess XAI systems for robustness, privacy, and ethical considerations, ensuring responsible AI development.
- Apply XAI techniques to cutting-edge areas like Generative AI, staying ahead of emerging trends.

This course is ideal for AI professionals, data scientists, machine learning engineers, product managers, and anyone involved in developing or deploying AI systems. By mastering XAI, you'll be equipped to create AI solutions that are not only powerful but also interpretable, ethical, and trustworthy, solving critical challenges in domains like healthcare, finance, and criminal justice.

To succeed in this course, you should have experience building AI products and a basic understanding of machine learning concepts like supervised learning and neural networks.

**Coursera**

If you have any Coursera-Specific questions about navigation or assignment types, the best resource would be the Coursera Learner Help Center. You can click the small question mark icon in the bottom right of your screen at any time to access help.

**Certificate vs. Audit Experience**

The required assignments for this course to earn the certificate are graded quiz activities.

You will only be able to submit graded quizzes if you are enrolled to earn the certificate, rather than auditing the course.

As a learner enrolled for a certificate, you will be able to access:

- The course quizzes, which means you will be able to submit the quizzes and receive automatic feedback on your answers.
- All other course content (videos, readings, and discussions).

As an auditing learner, you will only be able to access the videos, readings, and discussions. You can view the graded quizzes, but you will not be able to submit your answers and receive feedback.
