

Climate Data Online: Web Services Documentation

Getting Started	Datasets	Data Categories	Data Types	Location Categories	Locations	Stations	Data
---------------------------------	----------	---------------------------------	----------------------------	-------------------------------------	---------------------------	--------------------------	----------------------

Datasets

All of the CDO data are in datasets. The containing dataset must be known before attempting to access its data.

Endpoints

PATH	DESCRIPTION
https://www.ncei.noaa.gov/cdo-web/api/v2/datasets/{id}	Used to find information about dataset with id of {id}
https://www.ncei.noaa.gov/cdo-web/api/v2/datasets	When used without optional parameters, fetches list of available datasets. Use with optional parameters below to filter results

Additional Parameters

PARAMETER	EXAMPLE	DESCRIPTION
datatypeid	ACMH	Optional. Accepts a valid data type id or a chain of data type ids separated by ampersands (e.g. <i>datatypeid=TAVG&datatypeid=TOBS</i>) or a common separated list (e.g. <i>datatypeid=TAVG,TOBS</i>). Datasets returned will contain all of the data type(s) specified
locationid	FIPS:37	Optional. Accepts a valid location id or a chain of location ids separated by ampersands (e.g. <i>locationid=FIPS:37&locationid=FIPS:45</i>) or a common separated list (e.g. <i>locationid=FIPS:37,FIPS:45</i>). Datasets returned will contain data for the location(s) specified
stationid	COOP:010957	Optional. Accepts a valid station id or a chain of station ids separated by ampersands (e.g. <i>stationid=COOP:310090&stationid=COOP:310184</i>) or a common separated list (e.g. <i>stationid=COOP:310090,COOP:310184</i>). Datasets returned will contain data for the station(s) specified
startdate	1970-10-03	Optional. Accepts valid ISO formatted date (yyyy-mm-dd). Datasets returned will have data after the specified date. Paramater can be use independently of enddate
enddate	2012-09-10	Optional. Accepts valid ISO formatted date (yyyy-mm-dd). Datasets returned will have data before the specified date. Paramater can be use independently of startdate
sortfield	name	Optional. The field to sort results by. Supports id, name, mindate, maxdate, and datacoverage fields
sortorder	desc	Optional. Which order to sort by, asc or desc. Defaults to asc
limit	42	Optional. Defaults to 25, limits the number of results in the response. Maximum is 1000
offset	24	Optional. Defaults to 0, used to offset the resultlist. The example would begin with record 24

Examples

Click on the links below and a preview will display example results from each REST query. Copy the URL listed below to use as a reference.
*Note: Assigned token is required to use these queries and *must* be in the header

[Fetch all available datasets](#)
`https://www.ncei.noaa.gov/cdo-web/api/v2/datasets`

[Fetch all information about the GSOY dataset specifically](#)
`https://www.ncei.noaa.gov/cdo-web/api/v2/datasets/GSOY`

[Fetch all available datasets with the Temperature at the time of observation \(TOBS\) data type](#)
`https://www.ncei.noaa.gov/cdo-web/api/v2/datasets?datatypeid=TOBS`

[Fetch all available datasets with data for a given set of stations](#)
`https://www.ncei.noaa.gov/cdo-web/api/v2/datasets?stationid=COOP:310090&stationid=COOP:310184&stationid=COOP:310212`
