Instantiate a custom Object - solution

Solution code

```
1 # Sample Solution code
2 class MyFirstClass():
3     print("Who wrote this?")
4     index = "Author-Book"
5
6     def hand_list(self, philosopher, book):
7         print(MyFirstClass.index)
8         print(philosopher + " wrote the book: " + book)
9
10 whodunnit = MyFirstClass()
11 whodunnit.hand_list("Sun Tzu", "The Art of War")
```

Run

Reset

```
Who wrote this?
Author-Book
Sun Tzu wrote the book: The Art of War
Author-Book
Sun Tzu wrote the book: The Art of War
None
```
