2.4.R1 (1/1 point)

Look at the graph given on page 30 of the notes. Which of the following is most likely true of what would happen to the Test Error curve as we move $1/K$ further above 1?

- ☐ The Test Errors will increase
- ☐ The Test Errors will decrease
- ☐ Not enough information is given to decide
- ☒ It does not make sense to have $1/K > 1$ ✓

EXPLANATION

Since K is the number of neighbors, the value of K must be a Natural Number. This means that $1/K \leq 1$.
