6.R.R1 (1/1 point)

One of the functions in the glmnet package is `cv.glmnet()`. This function, like many functions in R, will return a list object that contains various outputs of interest. What is the name of the component that contains a vector of the mean cross-validated errors?

Answer: cvm**EXPLANATION**

To check the return value of a function, use `?functionname` and then scroll down to the Value heading.
