8.R.R1 (1/1 point)

You are trying to reproduce the results of the R labs, so you run the following command in R:

```
> library(tree)
```

As a response, you see the following error message:

Error in library(tree) : there is no package called 'tree'

What went wrong?

- ☐ You meant to use 'require(tree)'
- ☐ You meant to use 'library("tree")'
- ☒ The tree package is not installed on your computer ✓
- ☐ Nothing is wrong, that error message could not be produced by R

EXPLANATION

In order to install the package, run `install.packages()` or use the package installer through the R menu bar.
