Coding Exercise 1

Coding Exercise 1

Problem

Create and activate the virtual environment `ex1`. Then install the `colorama` package.

Expected Output

- In the terminal, enter the command:

ls

You should see the `ex1` directory in the output.

- In the terminal, list all of the installed packages in the virtual environment:

ls ex1/lib/python3.6/site-packages

You should see output similar to the following:

colorama pip pkg_resources-0.0.0.dist-info s
colorama-0.4.4.dist-info pip-9.0.1.dist-info __pycache__
easy_install.py pkg_resources setuptools

Submit your code for evaluation.

To create the virtual environment `ex1`, use the following command:

python3 -m venv ex1

Then activate the newly created virtual environment with this command:

source ex1/bin/activate

Finally, install the `colorama` package:

python3 -m pip install colorama

Check It!

LAST RUN on 7/25/2023, 1:36:24 AM

Check 1 passed

Check 2 passed
