

Formative Assessment 1

Formative Assessment

Arrange the blocks so that the terminal commands create and activate a virtual environment entitled `my-env`.

Drag the appropriate code blocks into the box below. **Hint:** not all of the code blocks will be used.

Drag from here

activate my_env/bin/source

python3 -m venv venv

Construct your solution here

mkdir my_directory

cd my_directory

python3 -m venv my_env

source my_env/bin/activate

The correct answer is:

```
mkdir my_directory
cd my_directory
python3 -m venv my_env
source my_env/bin/activate
```

- The block `python3 -m venv venv` is not correct because it would create a virtual environment entitled `venv`.
- The block `activate my_env/bin/source` is not correct because `activate` and `source` need to switch places.

Check It!
