Coding Exercise 1

Coding Exercise 1

Problem

The poetry project `ex1` has already been created for you. In addition, several packages have already been installed. However, you need to make the following changes to the virtual environment:

- Remove the `requests` package
- Install the `fire` package
- Install the `black` package as a development dependency

Expected Output

After adding and removing the specified packages, run the following commands to check your work before submission.

- Verify that `requests` has been removed from the virtual environment.

```
grep -c requests pyproject.toml
```

The `grep` utility counts the number of times `requests` appears in the `pyproject.toml` file. It should return `0`.

- Verify that `fire` has been installed to the virtual environment.

```
grep fire pyproject.toml
```

The `grep` utility search `pyproject.toml` for `fire` and returns the result.

```
fire = "^0.4.0"
```

- Finally, verify that `black` is installed as a development dependency.

```
grep -A 2 dev pyproject.toml
```

The `grep` utility searches `pyproject.toml` for the term `dev` and returns that result plus the next two lines in the file. You should see the `black` package listed in the output.

```
[tool.poetry.dev-dependencies]
pytest = "^5.2"
black = "^22.3.0"
```

Submit your code for evaluation.

The correct commands are:

Removing the `requests` Package

Use the `remove` command to uninstall the package:

```
poetry remove requests
```

Adding the `fire` Package

Use the `add` command to install the package:

```
poetry add fire
```

Adding a Development Dependency

Use the `--dev` flag to add a package as a development dependency:

```
poetry add black --dev
```

Check It!Show diff

LAST RUN on 7/25/2023, 1:38:35 PM

Check 1 passed

Check 2 failed

Output:

fire = "^0.5.0"

11:[tool.poetry.dev-dependencies]

12-pytest = "^5.2"

13-

Expected:

fire = "^0.4.0"

Feedback:

Did not verify that the "fire" package was installed on the virtual environment.

Check 3 failed

Output:

fire = "^0.5.0"

11:[tool.poetry.dev-dependencies]

12-pytest = "^5.2"

13-

Expected:

13-black = "^22.6.0"

Feedback:

Did not verify that the "black" package was added as a development dependency.
