

Formative Assessment 2

Formative Assessment

Fill in the blanks below.

- - Pyinstaller requires additional dependencies when bundling a Kivy application.
- - You can use the one-folder approach with a Kivy application.
- - You cannot use the one-file approach with a Kivy application.

The correct answers are:

- **False** - Pyinstaller requires additional dependencies when bundling a Kivy application
- **True** - You can use the one-folder approach with a Kivy application
- **False** - You cannot use the one-file approach with a Kivy application

Pyinstaller works with Kivy without having to install anything else. It can also bundle applications using either the one-file or one-folder approach.
