Reading Question

Which command would generate a Pyinstaller spec file for the `main.py` script?

☐`makespec main.py`☒`pyi-makespec main.py`☐`python-makespec main.py`☐`pyinstaller-makespec main.py`

The correct answer is:

`pyi-makespec main.py`

The `pyinstaller` command will generate a spec file and the executable all at once. The `pyi-makespec` command will just generate a spec file.
