1. For given matrices A, B, and C, which products are compatible? **1 / 1 point**

$A = \begin{bmatrix} x & x \\ x & x \\ x & x \\ x & x \end{bmatrix}$ $B = \begin{bmatrix} x & x & x \\ x & x & x \\ x & x & x \end{bmatrix}$ $C = \begin{bmatrix} x & x & x \\ x & x & x \end{bmatrix}$

Correct

2. For the given matrix A, what is dimensionality of $(A^T)^T$? **1 / 1 point**

$A = \begin{bmatrix} 4 & 3 & 6 \\ 1 & -3 & 2 \\ 2 & 8 & 5 \end{bmatrix}$

Correct

3. For the given vector v and matrix A, what combination is NOT compatible? **1 / 1 point**

$v = \begin{bmatrix} x \\ x \\ x \end{bmatrix}$ $A = \begin{bmatrix} x & x & x & x \\ x & x & x & x \\ x & x & x & x \end{bmatrix}$

Correct

4. Let's assume vA is compatible. What is the result of $(vA)^T$? **1 / 1 point**

Correct

5. For the given matrix A, what matrix B should we pick so that the result of their multiplication is equal to A (AxB = A)? **1 / 1 point**

$A = \begin{bmatrix} x & x & x & x \\ x & x & x & x \\ x & x & x & x \\ x & x & x & x \end{bmatrix}$

Correct

6. For a given matrix A, if there is a identity matrix I so that AxI = A. What is a size of I? **1 / 1 point**

$A = \begin{bmatrix} x & x & x & x \\ x & x & x & x \\ x & x & x & x \\ x & x & x & x \end{bmatrix}$

Correct

7. For given matrices A, B, C, which statements are well defined and true? **1 / 1 point**

$A = \begin{bmatrix} x & x \\ x & x \\ x & x \\ x & x \end{bmatrix}$ $B = \begin{bmatrix} x & x & x \\ x & x & x \\ x & x & x \end{bmatrix}$ $C = \begin{bmatrix} x & x & x \\ x & x & x \end{bmatrix}$

Correct
