Jar does not exist

Mourad Bouguerra PIG: A Dataflow Engine for Hadoop (/learn/bigdata-analytics/module/2Z7u9/discussions) · 17 days ago (/learn/bigdata-analytics/discussions/chxjdaUUEeWfHwqLjBT9w)
analytics/profiles/7a8625e3f394bd280666e847c757d647)
The the following jar file

/home/cloudera/incubator-datafu/datafu-pig/build/libs/datafu-pig-incubating-1.3.0-SNAPSHOT.jar

does not exist.

You can find the public repository at repository.apache.org (<https://repository.apache.org>) and update the script to point to the downloaded folder

I went to the site listed by Vikram, searched for datafu, but only get datafu-hourglass-incubating-1.3.0.jar, nothing about pig.
Please help with more detailed instructions on how to do this step.

Is it just me, or this PIG module has been overall the worst explained yet?

(/learn/bigdata-analytics/profiles/57b1a83b0932619174e94328e78b7c8)
Couldn't find *SNAPSHOT.jar. However, I was able to find the following: <https://repository.apache.org/#nexus-search;quick~pig-incubating>
selected the 'artifact' tab to download.

Here is the direct link the file. Please remember to adjust the "register" command to point to the file location that you put the file.

Ex: if you put it into /home/cloudera/lib/

You will need to replace the filepath in the register folder.

<http://www.apache.org/dyn/closer.cgi/incubator/datafu/apache-datafu-incubating-1.3.0/>
(<http://www.apache.org/dyn/closer.cgi/incubator/datafu/apache-datafu-incubating-1.3.0/>)

Hope this helps

(/learn/bigdata-analytics/profiles/0f4fa1801fc3ffe2e0aa116088b54e88)
You can download the file from the following link in the Apache's Maven Repository for DataFu.

<https://repository.apache.org/content/groups/public/org/apache/datafu/datafu-pig-incubating/1.3.0/datafu-pig-incubating-1.3.0-SNAPSHOT.jar>

https://www.coursera.org/learn/bigdata-analytics/discussions/chxjdaUUEeWfHwqjLjBT9w/replies/HW7PBqi7EeWhLRikesxXNw

incubating-1.3.0.jar

(/learn/bigdata-analytics/profiles/e6a52eb8e3f8bc7a9c1d83ea72a7a65b)
I had loaded datafu-pig-incubating-1.3.0.jar in /home/cloudera and ran following command
registor /home/cloudera/datafu-pig-incubating-1.3.0.jar;

define CSVLoader org.apache.pig.piggybank.storage.CSVLoader());

No error came.

but while loading first file by using

Y = LOAD '/usr/lib/hue/apps/search/examples/collections/solr_configs_yelp_demo/index_data.csv' USING CSVLoader()
AS(business_id:chararray,cool,date,funny,id,stars:int,text:chararray,type,useful:int,user_id,name,full_address,latitude,longitude,neighborhoods,open,review_count,state);

but I get following error:

2015-12-16 06:12:47,619 [main] ERROR org.apache.pig.tools.grunt.Grunt - ERROR 1070: Could not resolve
org.apache.pig.piggybank.storage.CSVLoader using imports: [, java.lang., org.apache.pig.builtin., org.apache.pig.impl.builtin.]

I can not understand this, please help.

Prajakta, did you register the piggybank.jar?

Yes, I did register. I reinstalled datafu-pig for Cloudera from Cloudera site, then it worked well. Thanks.
