

... 18 more

hdfs://quickstart.cloudera:8020/tmp/temp1288431513/tmp-1226022508,

Input(s):

Failed to read data from "/usr/lib/hue/apps/search/examples/collections/solr_configs_yelp_demo/index_data.csv"

Output(s):

Failed to produce result in "hdfs://quickstart.cloudera:8020/tmp/temp1288431513/tmp-1226022508"

Any idea of why this is caused? I was wondering if I have to register the MAX function but I can-t find it in the datafu jar.

Any help will be appreciated.

Thanks

org.apache.pig.backend.executionengine.ExecException: ERROR 2118: Input path does not exist:
hdfs://quickstart.cloudera:8020/usr/lib/hue/apps/search/examples/collections/solr_configs_yelp_demo/index_data.csv

and solve it with

1.)

hdfs dfs -copyFromLocal /usr/lib/hue/apps/search/examples/collections/solr_configs_yelp_demo/index_data.csv
/user/cloudera

into HDFS

2.) change the PATH in the

Y = LOAD '/....'

command in my script.

with regards Eik
