Hi

What browser and version are you using? eg Chrome, Firefox 24, 25, IE 8, 9, 10 or 11 Safari 4, 5 or 6, Opera 16, 17 or 18. Normally help about will tell you the version

I have been having the same issue for a lot longer than just this year. If you continue to click on the photo you have uploaded and click on add, it will eventually work.

For those still having trouble you need to help us by letting us know the following information

- 1) What is your Blog Address
- 2) What browser and version are you using? eg Chrome, Firefox 24, 25, IE 8, 9, 10 or 11 Safari 4, 5 or 6, Opera 16, 17 or 18. Normally help about will tell you the version
- 3) Have you tried using a different browser to see if that works
- 4) Have you tried clearing out BOTH your Cookies and Cache
- 5) Have you disabled ALL Extension/Addons in your Browser

+1

Amy Crehore said:

Yes I have tried doing all those things.
I have tried posting with IE and Safari to my blog. On different computers.
amycrehore.blogspot.com
No, I haven't tried chrome.

+1

Amy Crehore said:

Hi Dark UFO. Yes, blogger now works fantastically in google chrome. I finally was able to add a photo to my blog. Too bad it doesn't work using any other browsers and only freezes if I try. That is a problem for many people. I will keep google chrome as my alternative browser for blogging, at least until issue is fixed.

+1

DarkUFO - Blogger Top Contributor said:

Thanks Amy, glad you are working.

I'll file a ticket with Google engineering to investigate why some people can't use Firefox or IE.

I've personally tested with both Firefox and IE and they work fine for me.

+1

Amy Crehore said:

It doesn't work on safari ipad either.
Note: A month ago I got an "error" message when using IE to post on my blog.
That happened a few times, before this latest incident happened.

Deborah threefourfive said:

Hi,

I tried chrome and that didn't work. I usually use IE 11 for all internet. I have cleared cookies, I did a restart. I do not write in my blog very often, tried to last week and couldn't upload a pic and cannot today either. I did each item listed. Made sure pop-ups are off. But still cannot upload a picture.

DarkUFO - Blogger Top Contributor said:

What happened when you used Chrome? Did you get an error?

Can you post a screenshot of what you see in Chrome when you try to upload.

+1

Deborah threefourfive said:

How do I post a screen shot?

+1

□ □ □

2/8/14

DarkUFO - Blogger Top Contributor said:

Thanks Deborah. You have a lot of extensions installed in Chrome.

A number of these are known to cause a problem.

Try doing a reset to disable your Extensions and then try again to see if it works.

Follow the instructions here

<https://support.google.com/chrome/answer/3296214?hl=en>

Once done, try again and let me know how you get on.,

If you are still having trouble please post a fresh screenshot

Deborah threefourfive said:

Hi..got it and was able to upload the photo. When is blogger going to allow one to work from IE?

Just wondering..

Thank you so very much for your personal help here.

Have a blessed day....Deb

DarkUFO - Blogger Top Contributor said:

Glad it worked.

I'm not sure to be honest. Most IE users are working fine.

Do you have any extension/addons installed in IE?

What version of IE are you using?

+1

2/8/14

Deborah threefourfive said:

Extensions are Norton, google tool bar, and that is all. It says I am using EI 11.

I use to be able to do all my blogging from EI and as far as I know nothing has changed. But then somehow some search engine got added to some other legit download - irks me every time some legit company basically sneaks in another program of some sort. I then have to go and uninstall which doesn't always work smoothly.

Anyway I do appreciate the help.

Deb

esteban camaras said:

Well I've had the same issue for at least three weeks now, nothing has changed at all on my Aspire one D255E, I've downloaded chrome but it doesn't seem to make any difference, I'd like to know what Blogger have changed? my blog address is <http://skip-ratting.blogspot.co.uk/>...currently have to upload pictures onto picassa albums on my old desktop then do the draft on my Aspire notebook then put the pictures on via my kindle fire from picassa ...a faff to say the least so much so that I've only put on one new post since Christmas!!!

+1

2/9/14

DarkUFO - Blogger Top Contributor said:

esteban, can you post a screenshot of the issue in Google Chrome.

+1

2/9/14

esteban camaras said:

Ok I've re installed Chrome and it now appears to work though I have to open it as administrator, it's a bit of a faff still as all my favourites are on my normal browser.

DarkUFO - Blogger Top Contributor said:

You can import your Bookmarks from IE into Chrome very easily.

See here

<https://support.google.com/chrome/answer/96816?hl=en>

esteban camaras said:

ok everything now appears ok and I've imported all my bookmarks/favourites from IE, I'd really like to know what have Google/Blogger changed and why, was it essential if so why was prior notice given? is it so we use Chrome to make it easier for Google to 'spy' on us for marketing reasons???

+1

2/10/14

DarkUFO - Blogger Top Contributor said:

I'm not aware they changed anything. IE is extremely buggy.

My IE works fine on Blogger and so do 1000's of other users but I never use it as it's very insecure.

+1
