Histogram plots

Go to next item

Review Learning Objectives

1. Use the histogram function to display the fuel efficiency data from the auto-mpg dataset with a 6 bin histogram.

Due Apr 21, 11:59 PM IST

Try again

The fuel efficiency is in the MPG vector. How many of the histogram bin corresponding to the range [41,48] mpg?

To Pass 80% or higher

Hint: You can hover your mouse cursor over the middle of the top of the bar in the histogram for a few moments, and MATLAB will display the height of the bar in a pop up window. Alternatively, if you output a handle to the histogram when calling the histogram function (h = histogram(...)), the height of the bars is in the vector h.Values.
