Review Learning Objectives

1. A color image is formed by creating a 3-channel image matrix, where the 3 channels represent the red, green, and blue intensities for each pixel. In the attached ".mat" file, you will find three single channel 256x256 image matrices R, G, and B.

1 / 1 point

Submit your assignment

Try again

Use R, G, and B to construct a 256x256x3 color image matrix with R forming the first channel, G the second, and B the third. Display the result using the "imagesc" function. What is the secret message displayed in the resulting color image?

RGB
