Instructions

Review Learning Objectives

1.

What is a feedforward neural network?

1 / 1 point

Ⓐ

A type of neural network where connections between the nodes do not form cycles.

Ⓑ

A neural network that requires the use of a hidden layer.

Ⓒ

A network where signals can flow in both forward and backward directions.

Ⓓ

A neural network with multiple layers of nodes.

Ⓔ

Correct

Submitted

Attempts

Correct! In feedforward neural networks, the information moves in only one direction forward from the input nodes, through the hidden nodes (if any), and to the output nodes.
