1. Let S be a set. Which one of the following is a correct definition of a partition P of S ?

1 / 1 point

- ☒ The intersection of any two different elements of P is equal to $\emptyset$ and the union of all the elements of P is equal to S
- ☐ The intersection of any two elements of P is equal to $\emptyset$ and the intersection of all the elements of P is equal to S
- ☐ The intersection of any two different elements of P is equal to S and the union of all the elements of P is equal to $\emptyset$
- ☐ None of these answers

✔ Nice work

This is the definition of a partition: all the elements of P are disjoint and the union of all the elements of P is equal to S

2. Let $S = \{1, 2, 3\}$ be a set. Which one of the following is a partition of S ?

1 / 1 point

- ☒ $\{\{1\}, \{2\}, \{3\}\}$
- ☐ $\{\{1\}, \{2\}, \{3\}, \{1, 2\}, \{1, 3\}, \{2, 3\}, \{1, 2, 3\}\}$
- ☐ $\{\{1\}, \{1, 2\}, \{3\}\}$
- ☐ $\{\{1\}, \{2\}, \{1, 2, 3\}\}$

✔ Nice work

All the elements are mutual disjoint and the union of all the three elements is equal to S
