Extracting Data from the World

1 / 1 point

1. Take a picture of a room and create a list of everything in the room. Now, take a second photo that overlaps the original photo and ask it to extract a list of items in the same format, but to also tell you which items appear in both photos. Cut/paste the output in (not the photos) as the answer.

Unlimited

Certainly! Let's compare the items in both rooms and list common ones:

Sofa

Cushions

Painting

These items appear in both rooms. If you have any other questions, feel free to ask!
