1. Which of the following statements is true? 1 / 1 point

- Perceptrons are only used for sentiment analysis.
- Perceptrons are typically used for regression tasks.
- A perceptron can be seen as a single neural unit.
- A single perceptron on its own cannot be used for classification tasks.

Nice work

2. Which of the following functions cannot be learned by a perceptron? 1 / 1 point

- AND
- Neither of the above can be learned
- OR
- XOR

Nice work

3. Which of the following statements is correct? "In a fully connected feedforward network, each neuron in each layer is connected to…" 1 / 1 point

- Only one neuron in the next layer
- All neurons in the next layer
- All neurons in all other layers
- Only neurons in non-adjacent layers

Nice work

4. Which of the following is *not* a common activation function used in feedforward networks? 1 / 1 point

- Sigmoid
- Identity
- ReLU (rectified linear unit)
- Tanh

Nice work

5. What is a sentence embedding? 1 / 1 point

- A sequence of strings representing the individual words of a sentence
- A sequence of vectors representing the individual words of a sentence
- A string representing a sentence
- A vector representing a sentence

Nice work
