Language-and-Vision Models
Practice Assignment • 15 min

Due Nov 20, 11:59 PM IST

Your grade: 100%

Your latest: 100% • Your highest: 100% • To pass you need at least 80%. We keep your highest score.

Next item →

1. What is a common application of vision-language models? 1 / 1 point

- Machine translation
- (selected) Image captioning
- Speech recognition
- Text summarization

Nice work

2. In contrastive learning for vision–language models, what is being contrasted? 1 / 1 point

- Different text descriptions
- Different images
- (selected) Matching vs. non-matching image–text pairs
- Different model architectures

Nice work

3. What is the primary purpose of vision-language pretraining? 1 / 1 point

- To improve image quality
- (selected) To learn aligned representations of images and text
- To reduce model size
- To speed up training

Nice work

4. What is "grounding" in vision–language models? 1 / 1 point

- (selected) Connecting language to visual concepts
- Data preprocessing
- Output formatting
- Model initialization from visual input

Nice work

5. True or False: Pretraining of models which accept multiple modalities cannot be done in a multitask fashion. 1 / 1 point

- True
- (selected) False

Nice work
