Non-functional Properties of Large Language Models
Practice Assignment • 15 min

Due Nov 23, 11:59 PM IST

Your grade: 100%

Your latest: **100%** • Your highest: **100%** • To pass you need at least 80%. We keep your highest score.

Next item →

1. What is a hallucination in the context of large language models? 1 / 1 point

- (•) When the model generates factually incorrect or fabricated information
- ( ) When the model reminds you of something you have previously told it
- ( ) When the model refuses to answer a question
- ( ) A visual output generated by the model

Nice work

2. True or False: Large language models can amplify the biases that exist in the original data. 1 / 1 point

- ( ) False
- (•) True

Nice work

3. How can the alignment of models be increased? 1 / 1 point

- ( ) Data
- ( ) Modeling
- ( ) Training
- (•) All of the above

Nice work

4. Which of the following is a way to make inference more efficient? 1 / 1 point

- (•) Model distillation
- ( ) Crosslingual transfer
- ( ) Pretraining
- ( ) All of the above

Nice work

5. What is the goal of membership inference attacks? 1 / 1 point

- ( ) To get access to a model's parameters
- (•) To predict if given datapoints are part of a model's training data
- ( ) To predict if a given datapoint is part of the test set
- ( ) All of the above

Nice work
