1. Which of the following statements are true?

1 / 1 point

- ☐ MATLAB matrix arrays can be indexed by column name.
- ☒ MATLAB matrix arrays support mathematical operations such as addition and multiplication.
-  Nice work
- ☐ MATLAB matrix arrays hold different types of data (e.g., floating-point numbers and integers) inside the same object.
- ☒ MATLAB matrix arrays can have more than 2 dimensions.
-  Nice work

2. A cell array with 5 rows and 5 columns is stored in a variable 'A'. Select all operations that set the element located in the 2nd row of the 2nd column to a cell containing the number of 2.

1 / 1 point

- ☐ A{2, 2}={2}
- ☒ A(2, 2)={2}
-  Nice work
- ☒ A{2, 2}=2
-  Nice work
- ☐ A(2, 2)= 2

3. Which of the following MATLAB data types are dynamically sized (i.e., new elements can be added after creation)?

1 / 1 point

- ☒ All of the above
- ☐ MATLAB cell arrays
- ☐ MATLAB table arrays
- ☐ MATLAB matrix arrays
- ☐ MATLAB categorical arrays
-  Nice work

4. Which of the following statements are true?

1 / 1 point

- ☐ MATLAB cell arrays support direct mathematical operations such as addition and multiplication.
- ☐ MATLAB cell arrays can be indexed by column name.
- ☒ MATLAB cell arrays hold different types of data (e.g., floating-point numbers and integers) inside the same object.
-  Nice work
- ☒ MATLAB cell arrays can have more than 2 dimensions.
-  Nice work

5. The dataset is as follows.

1 / 1 point

Tree number	Type	Height	Age
1	Oak	25	300
2	Willow	14	20
3	Birch	18	75
4	Oak	19	175
5	Willow	15	30

An experiment is being conducted to determine whether a machine learning model can predict the type of tree based on its height and age. The model estimates the probability that a tree of a specific height and age belongs to one of three tree types. The tree type is represented using one-hot encoding. For example, tree number 1 is encoded as [1, 0, 0], and tree number 2 is encoded as [0, 1, 0]. How would tree numbers 3 and 4 be encoded?

- ☐ [0, 0, 1] and [0, 0, 1], respectively
- ☒ [0, 0, 1] and [1, 0, 0], respectively
- ☐ [0, 0, 1] and [0, 0, 0], respectively
- ☐ [0, 1, 0] and [1, 0, 0], respectively
-  Nice work
