1. Which of the following dataset is linearly separable?

1 / 1 point

- ☐ A
- ☐ B
- ☒ C

👉 Nice work

2. Which of the following statements are true?

0.8 / 1 point

- ☐ A smaller margin leads to better generalization performance.
- ☒ SVM finds the hyperplane with the maximum separation margin for the training data.

👉 Nice work

- ☐ In SVM, the hyperplane is only determined by support vectors.
- ☒ For a linearly separable dataset, there are infinitely many hyperplanes that can separate it.

👉 Nice work

⊗ You didn't select all the correct answers

3. Which of the followings are correct about nonlinear SVM?

1 / 1 point

- ☒ With the kernel trick, the mapping function does not have to be explicitly defined.

👉 Nice work

- ☒ With the kernel trick, the dot product does not have to be explicitly computed.

👉 Nice work

- ☐ For a given task, we cannot select the kernel functions freely.
- ☒ The linear kernel is preferred for large datasets due to its low complexity.

👉 Nice work

4. In SVM, if the number of the input features is 2, then the hyperplane is a _____.

0 / 1 point

- ☒ Line
- ☐ Plane
- ☐ Point

⊗ Try again

5. In one-vs-rest N-class SVM, how many SVMs are learned?

1 / 1 point

- ☐ $N(N-1)/2$
- ☐ $N(N-1)$
- ☐ $2N$
- ☒ N

👉 Nice work
