1. Which of the following statements are true?

1 / 1 point

☒ For a linearly separable dataset, there are infinitely many hyperplanes that can separate it.

👉 Nice work

☒ SVM finds the hyperplane with the maximum separation margin for the training data.

👉 Nice work

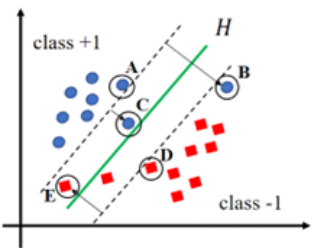

☐ A smaller margin leads to better generalization performance.

☒ In SVM, the hyperplane is only determined by support vectors.

👉 Nice work

2. Find all support vectors in the following soft margin SVM.

1 / 1 point

☒ A

👉 Nice work

☒ B

👉 Nice work

☒ C

👉 Nice work

☒ D

👉 Nice work

☒ E

👉 Nice work

3. In one-vs-rest N-class SVM, how many SVMs are learned?

1 / 1 point

☒ N

☐  $N(N-1)$

☐  $2N$

☐  $N(N-1)/2$

👉 Nice work

4. In SVM, if the number of the input features is 2, then the hyperplane is a \_\_\_\_\_.

1 / 1 point

☐ Point

☒ Plane

☐ Line

👉 Nice work

5. In soft margin SVM, the hyperparameter C controls the trade-off between misclassification and margin width. Which of the following statements are correct?

1 / 1 point

☒ The larger C is, the greater the penalty for misclassification.

👉 Nice work

☐ The larger C is, the wider the margin.

☒ The larger C is, the fewer points are misclassified.

👉 Nice work
