1. What is the purpose of the hidden layers in an ANN?

1 / 1 point

- ☒ Extract and learn features
- ☐ Regularization
- ☐ Model output
- ☐ Model input

✔ Nice work

2. What is the key difference between L1 and L2 regularization?

1 / 1 point

- ☒ L1 adds the absolute values of weights to the loss, while L2 adds the squared values to the loss.
- ☐ L1 is used for classification, and L2 is used for regression.
- ☐ L1 and L2 have the same effect on the model parameters.
- ☐ L1 and L2 are interchangeable terms.

✔ Nice work

3. What does the output layer of an ANN represent?

1 / 1 point

- ☒ Model prediction
- ☐ Regularization parameter
- ☐ Extracted feature
- ☐ Input feature

✔ Nice work

4. What is the primary objective of training an ANN?

1 / 1 point

- ☒ Minimize the difference between predicted and actual values.
- ☐ Minimize the validation loss.
- ☐ Test the performance of the chosen activation functions.

✔ Nice work

5. What are the purposes of using a validation set during ANN training?

1 / 1 point

- ☒ Estimate model generalization.

✔ Nice work

- ☐ Identify outliers in the dataset.
- ☒ Prevent overfitting.

✔ Nice work

- ☐ Increase training speed.
