Practice Learning Check - Uniform-cost Search & Heuristic Functions

Instructions

Review Learning Objectives

1. True or false: Uniform-cost search is cost-optimal but not necessarily complete. 1 / 1 point
- True

False

Correct

Let's chat

Uniform-cost search expands the node with the lowest path cost and will find a solution when there is one.

Assignment details

2. True or false: Like breadth-first search, uniform-cost search explores all possible paths when exploring. 1 / 1 point
- True

False

Correct

To pass you need at least 80%. We keep your latest score.

View submission

See feedback

Breadth first search explores all possible paths in all directions.
3. True or false: The performance of heuristic search algorithms are independent of the quality of the heuristic function. 1 / 1 point
- True

False

Correct

Like

Dislike

Report an issue

A high quality heuristic function can reduce computational cost.
