

Discrete Binary Images

b_{ij} : Value at cell (pixel) in **column** i and **row** j . Assume pixel area = 1.

Area:
$$A = \sum_{i=1}^n \sum_{j=1}^m b_{ij}$$

Position: Center of Area (First Moment)

$$\bar{x} = \frac{1}{A} \sum_{i=1}^n \sum_{j=1}^m i b_{ij}$$

$$\bar{y} = \frac{1}{A} \sum_{i=1}^n \sum_{j=1}^m j b_{ij}$$
