Your latest: **100%** • Your highest: **100%** • To pass you need at least 80%. We keep your highest score.

6.2 Uses of Face Detection Self-Check Quiz

1. Which of the following applications would need Facial Recognition and cannot be done by simple Face Detection? **1 / 1 point**

Note: Face Detection simply locates the faces in an image and nothing more.

- [ ] Automatic selection of camera settings
- [x] Finding people on search engines

Correct
Finding people in search engines would require recognition of who the face belongs to. Similarly in Biometrics as well.

- [ ] Targeted intelligent marketing
- [x] Biometrics

Correct
Finding people in search engines would require recognition of who the face belongs to. Similarly in Biometrics as well.
