1. Execute the Coursera Lab Jupyter notebook for this lesson, which implements the EKF for parameter estimation.

1 / 1 point

What is the RMS parameter-estimation error computed over all parameters of the model? Enter your result with two digits to the right of the decimal point.

0.56

 **Correct**
Yes, that is correct.

2. For the same Coursera Lab Jupyter notebook, what is the RMS parameter-estimation error for the "b" parameter of the model? Enter your result with two digits to the right of the decimal point.

1 / 1 point

0.45

 **Correct**
Yes. That is correct.

3. For the same Coursera Lab Jupyter notebook, what is the percentage of time that the "b" parameter estimation error is outside of its estimation confidence bounds? Enter your answer with one digit to the right of the decimal point.

1 / 1 point

29.3

 **Correct**
Yes, that is correct.
