1. Execute the Coursera Labs Jupyter notebook for this lesson. What is the effective number of particles (effective sample size) at the beginning of the simulation? Enter your answer with one digit to the right of the decimal point.

1 / 1 point

500.0

✔ Correct
Yes, that is correct.

2. For the same Jupyter notebook, what is the effective number of particles (effective sample size) at the end of the simulation? Enter your answer with one digit to the right of the decimal point.

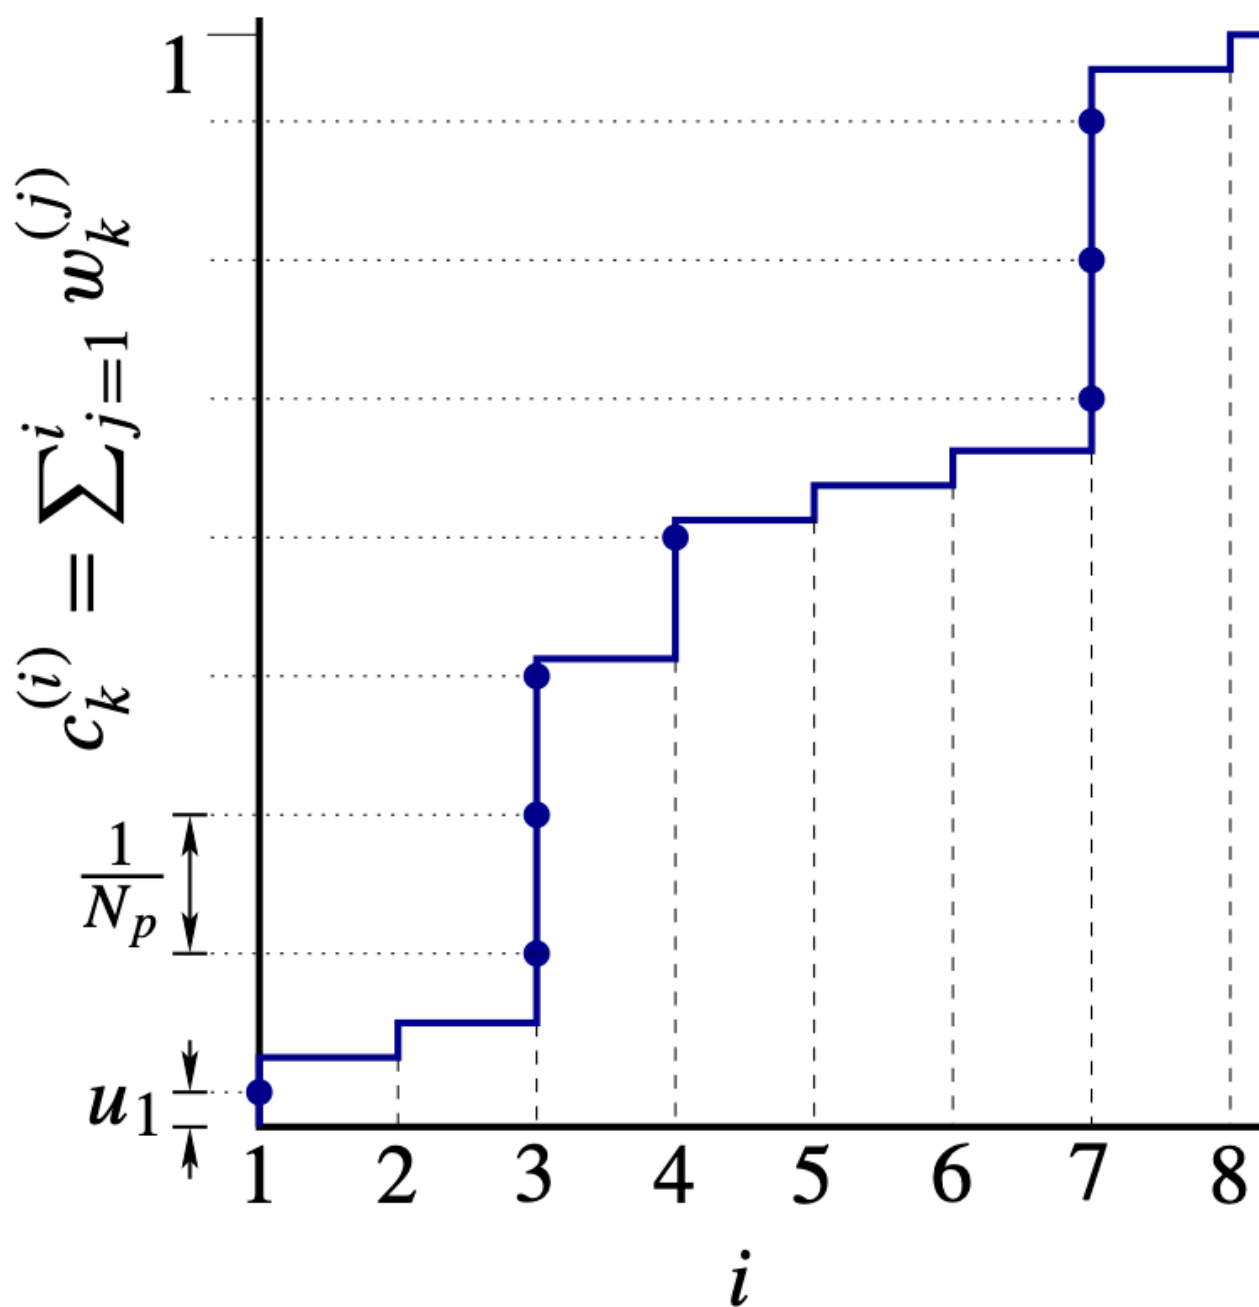

1 / 1 point

1.0

✔ Correct
Yes, that is correct.

3. Consider the figure below, which is reproduced from slide 7 of the lesson. How many times is the third particle reproduced in the new population of particles after resampling?

1 / 1 point

3

✔ Correct
Yes, that is correct.
