General instructions

Complete 

The instructions/prompts from the "pause and reflect" moments in some lecture are provided here. Feel free to copy and/or modify them to explore and understand how the LLM responds to different prompts. If the instruction for a lecture refers to code, that code will be available in the downloads for that lecture.

Please note that this lab contains instructions for every lecture in the course where Laurence prompts you to interact with the LLM. Therefore, it's recommended to only follow these instructions after Laurence instructs you to do so, by referring to the specific lecture's instructions.
